

Team Contract

INST327

Course Section: 0303

Team Number/Name: 4

Date: 2/23/2026

This team contract will set the procedures for the team for:

- Methods to contact other team members.
- Selection of the team liaison and team lead. (This does not need to be the same person.)
- Link to the team Google folder.
- Determining the team philosophy and ground rules.
- Setting teamwork due dates and obligations.
- Setting team meeting schedules.
- Provisions for dealing with conflict and/or team members who routinely do not complete their work or share it with the team, or in other ways are a significant negative influence on the team.

NOTE: Questions are included in each section to prompt conversation and help teams write their procedures for each section. Please delete the questions, when you have completed the section.

1. Contact Methods and Roles

Team Member # - team lead * - liaison ** - backup liaison)	Best Contact Method: include phone number, email address, etc.	Alternate Contact Method: include phone number, email address, etc.

** Rachel Galloway	443-876-9491	rgallowa@terpmail.umd.edu
*Kimberly Gordon	443-545-6880	kgordon5@terpmail.umd.edu
Sharon Madu	240-501-1849	smadu@umd.edu
# Danieshia Maragh	301-283-7847	dmaragh1@terpmail.umd.edu
Ediale Odia	301-904-5401	ediodia@terpmail.umd.edu

3. Team Meetings and Methods of Communication

During our group meetings, we will primarily meet over Zoom and other online platforms. To determine when we will schedule meetings, we will communicate the times during the week when we are available and try to work together to complete assignments. If our schedules do not align for a particular week, we will also work individually to complete a part of the work. We have an iMessage group chat where we are able to communicate.

For the first meeting for our project, it will most likely be over Zoom or another online platform since we all have varying schedules. We plan on meeting and talking about the project once our topic gets finalized.

4. Team Philosophy and Ground Rules

For our team philosophy, we'd like to focus on finishing and planning early. Our team motto will be "live before the deadline". This would help us be able to stay on task and plan earlier, so we can work out the kinks before we push our finished product. We believe

aspects like time management, accountability, and communication will play an effective role in ensuring our philosophy yields the best results. We will hold ourselves and our team members accountable for completing their tasks on time, and we will communicate if something can not be done before our set deadline.

Here are our expectations/ground rules:

- Deadlines will be set to at least 24-48 hours before the set due date
- All assignments should be completed and uploaded to Google Drive before the deadline
- No assignment shall be submitted without a team review
- Team members must be active and will be expected to respond within 24 hours unless they're experiencing extenuating circumstances.
- Meetings will be held once or twice a week to ensure we're on track to meet deadlines
- We will begin assignments as soon as possible to contribute while acknowledging your workload

5. Team Debate and Conflict

The team will make decisions if every member of the group unanimously agrees to them. If any group members disagree, they will explain why, and the rest of the team will listen and reconsider. If after this, the entire group still cannot agree, then the majority will rule, but we will aim for unanimous agreement first.

Each team member will decide what part they would like to do based on the actual work required. We will do this by first devising a plan for our project and breaking the segments down into 5 sections to see what we need to do. Then, each team member will pick a section that they believe they could excel in the most, ensuring that each section is done skillfully. If someone wants to do the same part or similar work, we could figure out a plan to divide the work between the two or make each person state their case as to why they want to work on that specific portion. It will be difficult to ensure that everyone is happy with their section, so we couldn't split it evenly, but we will try to make sure everyone has a section they are at least comfortable with doing.

We will aim to finish project deliverables the day before they are due to give every team member time to look over the entirety of each deliverable before they are submitted. Lead times will change depending on each assignment, but we will start deliverables as early as possible and finish them as early as possible so we do not submit anything late, and allow time for team members to look over all parts. If a team member cannot fulfill an obligation, their work will be split evenly among the other members.

b. Provisions for Dealing with Problem Team Members

The other team members will first discuss without the problematic team member to decide if there is an issue. If everyone agrees, then we will communicate with that member either in person or through their preferred method of communication. If the issues are not fixed within a week, then a second notice will be given either in person or through their preferred method of communication, and the instructor will also be notified (ELMS message or in class). If the problems continue and the group agrees that further action must be taken, we will arrange for a meeting with the instructor, team mentor, problem team member, and as many of the other team members as possible to come up with an action plan to address the problem.

6. Approval of the Team Contract by All Team Members

A team member's submission of the contract indicates that they have read the team contract and agree to all provisions of the contract. If a team member is not present at the initial team meeting, then they cannot dispute any of the procedures in the team contract but must agree. Each team member should submit an electronic copy of the team contract on ELMS.
